item

Kou

TERMS AND CONDITIONS:

Item2 Ltd's liability is limited to supply only. All mechanical and electrical connection must be undertaken by an independent qualified professional. Structural ceiling fixings must be tested before delivery and should each be rated to carry treble the load of the chandelier supplied. If you are unsure of the weight of your chandelier, please contact item on 0044 1782 621225.

Maintenance: Physical inspection of the armature, electrical wiring, steel suspension cables and all load bearing components should be undertaken every six months.

Only the supplied electrical flex, mechanical fixings and ceramic lampholders should be fitted. When replacing the halogen bulb, take special care not to touch the glass casing of the bulb with naked fingers. The slightest trace of oily residue adhering to the bulb will usually superheat within minutes and shatter the outer casing. Always handle with bulb with cotton gloves or an impermeable interlayer such as the polystyrene sheet that usually swaddles the bulb in its packaging.

The bulb must be positioned in the centre of armature, well clear of its metal interior. On no account should the bulb or lampholder be allowed to come into contact with the armature.

Kou may be cleaned using a damp lint-free cloth or feather duster. Stubborn stains are best removed by light abrasion with aluminium oxide sandpaper. Take care not to overstress or twist the spokes during cleaning as this could compromise the integrity of the fixing.

Each Kou armature is individually numbered, tested and certified to safely carry the relevant load. The steel suspension cables are rated for 99kg each. The armature has been treated with graded primer safe for 1000 salt hours and powder coated to protect against corrosion.

Kou is not designed to be hung in a damp environment and is not suitable for exterior location or wet Zone I, II or III usage.

Item 2 Ltd cannot be held responsible for injury or damages incurred as a result of incorrect installation, inappropriate treatment, or neglected maintenance.
